

Solve the following additions (squares)

$1+9=$	$2+2=$	$5+5=$	$6+10=$
$12+1=$	$10+2=$	$5+10=$	$2+10=$
$5+1=$	$2+10=$	$25+5=$	$3+10=$
$9+1=$	$6+2=$	$15+5=$	$10+7=$
$7+1=$	$2+8=$	$5+0=$	$8+10=$
$0+1=$	$14+2=$	$10+5=$	$5+10=$

Solve the following subtractions

$9-1=$	$2-2=$	$5-5=$
$12-1=$	$10-2=$	$10-5=$
$6-1=$	$14-2=$	$7-1=$
$10-1=$	$6-2=$	$12-2=$
$17-1=$	$8-2=$	$5-0=$
$1-0=$	$14-2=$	$8-2=$

Solve the following subtractions

$4+4=$	$8+2=$	$5-4=$
$3+1=$	$9-5=$	$6-4=$
$16-1=$	$4-2=$	$4+6=$
$7-3=$	$6+2=$	$3+7=$
$6-3=$	$8-5=$	$10+10=$
$10-6=$	$13-2=$	$15+5=$

$15 \quad \square \quad 9$

$20 \quad \square \quad 13$

$5+1 \quad \square \quad 8$

$10+2 \quad \square \quad 6+6$

$7 \quad \square \quad 1 \text{ ten}$

Compare these numbers using the following signs <, >, =

Complete the boxes to make the following statements right

$\square < \square < \square$

$\square < \square > \square$

Mia had 10 sweets, she gave one to each of her friends. She has 7 friends. How many sweets does Mia have left?

Marcel has 5 red beads and Alice has 9. How many red beads do they have altogether?

Kacper is 4 years older than his sister. His sister is 10. How old is Kacper?

I am thinking of a number and 4 is one less than my number. What is my number?
