

## **Maths Home Learning**

We know sometimes maths can be hard to do at home, because your parents learnt things differently to how we learn in school now. So to make it easier for you all, the scheme of work that we use in school, White Rose Maths, has set up some really great resources for you to use at home. They have some videos which explain each daily task and then supply a daily activity sheet for you to do too. You can print these off- or just write your answers on some paper.

Week 1:

**White Rose Maths** <https://whiterosemaths.com/homelearning/>

Year 6 focus this first week is Ratio! We did this a few weeks ago- so test yourself to see how much you can remember. You can log onto the other year groups work too, to revise any past work.

Want more?

**Master the Curriculum** <https://masterthecurriculum.co.uk/categories/?year=year-6>

Ask your parents to sign up to a website called Master the Curriculum. You can sign up for free and access some resources free. You may recognise some of the sheets as we use these in class.

**NRich** <https://nrich.maths.org/>

This is a brilliant website with lots of challenges for all ages and abilities to really get you thinking. Have a look on here for something to test yourself (and your family members too!)

Remember to ask if you need some help.
